

ORGANIZES AND SCHEDULES A MEDICATION REGIMEN FOR THE USER TO IMPROVE MEDICATION ADHERENCE.

MEDICATIONS MANAGER SYSTEM

- 1 Conveniently stores medication based on bottle size and time of dose
- 2 Uses National Drug Codes to catalog prescriptions for the user
- 3 Creates a customizable schedule of medication dosages for the user to track their medication regimen
- 4 Notifies the user when a dose is needed
- 5 Notifies the user when a prescription refill is needed
- 6 Stores important contacts for user and can automatically notify contact(s) if user misses a critical dose
- 7 Contacts primary care physician and/or emergency services if prompted by the user

MEDICATION ADHERENCE SCHEDULING ALGORITHM COMES IN BOTH A WIFI-CONNECTED DEVICE AND AN APPLICATION, AND IS DESIGNED WITH REDUNDANT USER INTERFACE SYSTEMS TO BROADEN THE CONSUMER BASE.
